EXERCISE
YOUR
IMAGINATION

Our story begins in 2016 when Ukidz was a single-brand distributor. Shortly after, we became the largest distributor of UGears Mechanical Models in the U.S. In a quest to reach a wider audience, 2020 led us to exciting partnerships! We expanded our brand offerings to include Pixio, Babai, Once-kids, Matador, Mozabrick and Unit Bricks. Our product lines are versatile and we strive to provide retailers, as well as consumers with unique, and high-quality specialty products from around the world. Ukidz is a dedicated team of professionals ready to provide unparalleled customer service to all.

UGEARS is the creator and manufacturer of unique self-propelled mechanical model kits designed for self-assembly without glue and made entirely of high-grade wooden material.

Some of the models draw inspiration from real-life mechanisms, some embody unique ideas, and all of them have been designed by UGEARS from scratch. The models are the original all-occasional gift, fun and smart hobby for kids and grownups of all ages. UGEARS has employed engineering know-how and production fine-tuning to ensure the assembly of the models is an engaging and rewarding experience for the whole family. The company is very serious about the quality of the kits: apart from meticulous product testing and quality control, the plywood is sourced from responsible and sustainable sources. In addition, while looking for a way to make the assembly experience smooth and enjoyable for the customers, UGEARS has invented and patented their very own plywood joint design. And that's only a start.

UGEARS is a startup established in 2014 in Kyiv, Ukraine. Today, UGEARS offers over 90 unique models of intelligent design, and there are more than 200 ideas for future mechanisms. The hobbyists are assembling UGEARS models across 5 continents.

In our age of electronics people still want to be creative with their hands and mind, seeking that rewarding feeling of constructing something with their own hands, inviting their kids and grandkids into the awesome (and, admittedly, old-school but yet-so-cool!) world of mechanics.

UGEARS STEM LAB

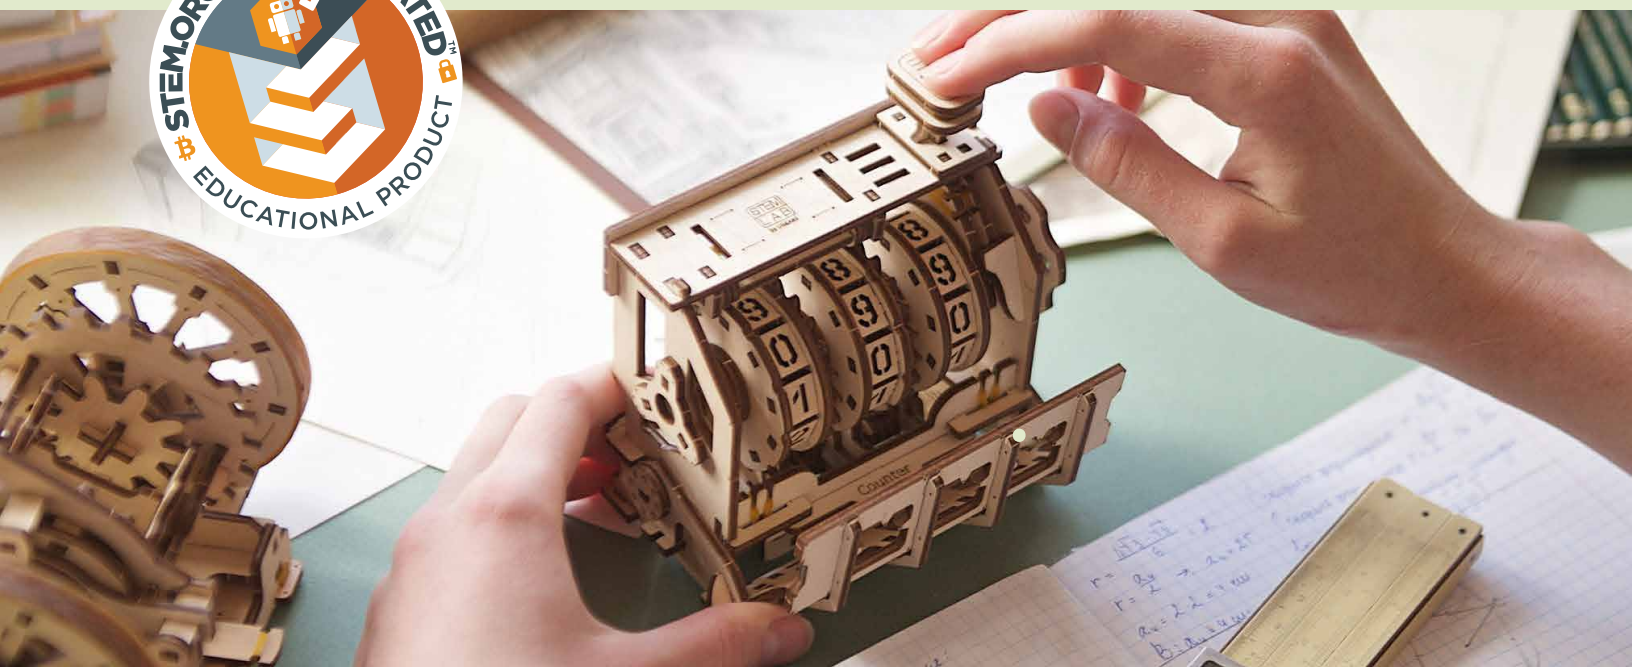

UGEARS 3D puzzle kits are not just entertaining, they're educational. Taking the latest in STEM and implementing it into our models, we help kids and adults of all ages learn how science, technology, engineering and math work together in certain mechanisms. Our approach includes a hands-on, skills-based technique that doesn't require additional tools or adhesives. What you get in the kit is all you need to create your project.

Included with each model is a pocket study guide that details the creation story, mechanism design, the working principle

and ideas for engaging activities. For a more immersive experience, use UGears Augmented Reality App to discover how each mechanism is used and interact with them in a virtual 3D space.

Whether you're a teacher, a student or just someone looking to have a little fun, the STEM LAB by UGEARS covers all the bases. By creating these with someone you love, you'll cultivate relationships while getting that satisfactory feeling of building something with your own two hands.

LOGO CUSTOMIZATION OF YOUR CORPORATE GIFTS

Make your brand stand out with UGEARS new bespoke logo customization service UGEARS wooden models are acknowledged to be a perfect gift that suits both people of your personal circle and your colleagues and business partners.

Today UGEARS looks into facilitating your brand visibility offering to personalize your favourite models with your company's logo.

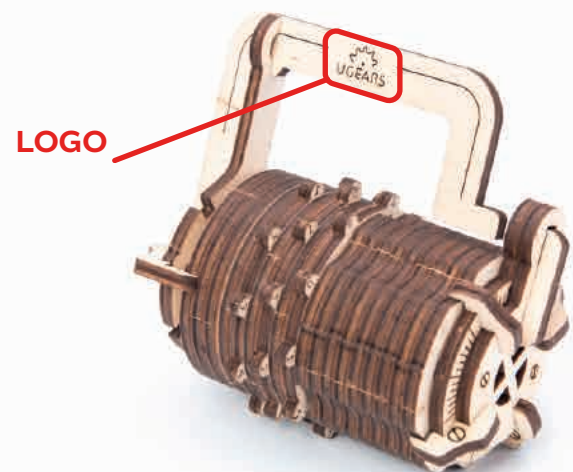

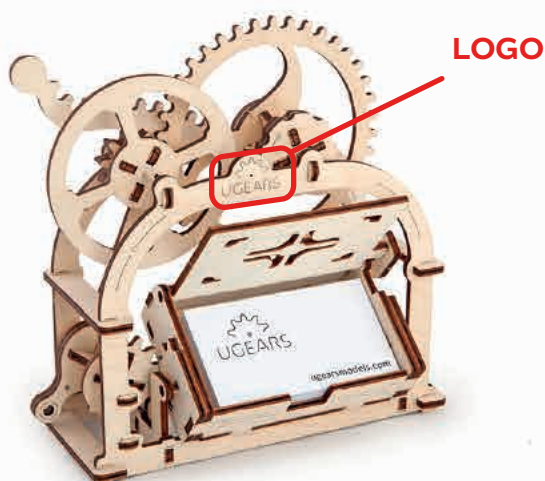

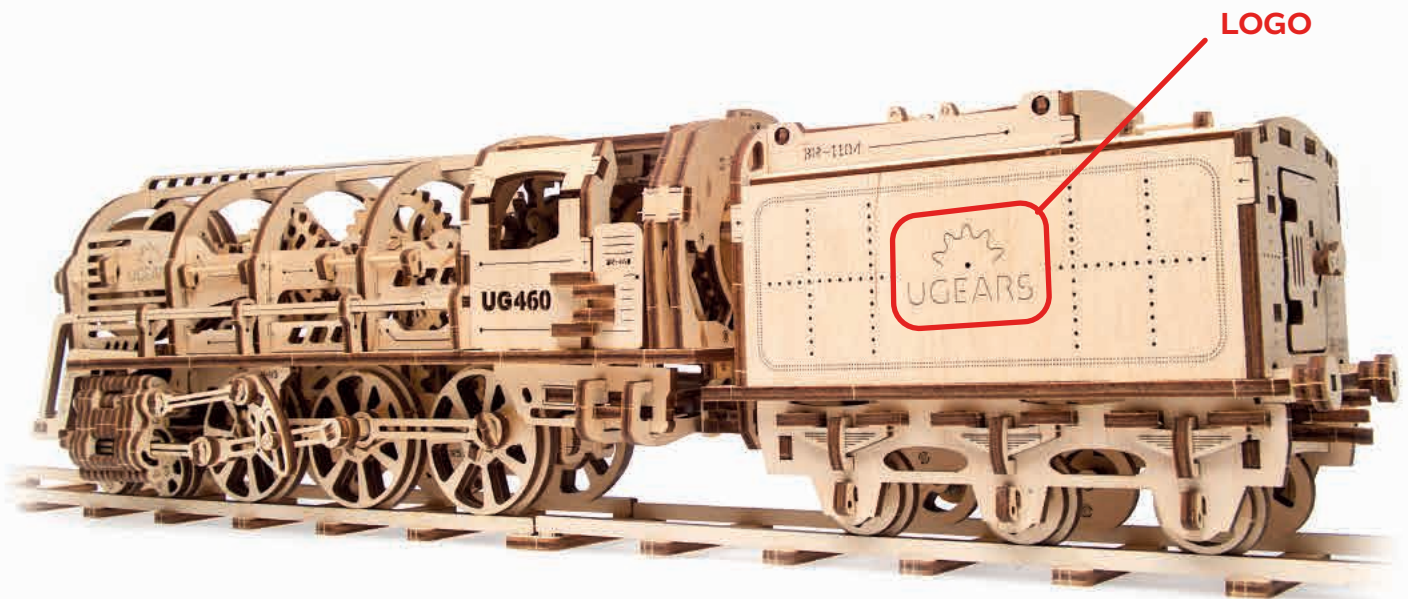

Eco-friendly, made out of wooden materials, Ugears 3D mechanical models are the best original present for kids and adults that will

tickle your imagination and facilitate spatial thinking.

Choose from a wide range of our products – from toys for children that will engage them in learning mechanics to sophisticated puzzles, an intellectual challenge for those who like to create with their own hands.

Logo customization of your corporate gifts ensures a more bespoke experience and guarantees better recognition of your brand.

Ask your local Sales Representative or contact Ukidz LLC office for more details.

UGEAR[®] 3D WOODEN COLORING MODELS

For kids from 5 years old... As well as grown-ups of any age! A great way to spend some quality time with children. Eco-friendly, cognitive, and developing.

Color using paint, pencils or markers. Assemble quickly (no-glue). A unique and handsome look. Capture the imagination of children for a long time. Must be ordered in increments of 5. Coloring utensils are not included.

PACKAGING SAMPLES

once—kids™

WE MAKE TOYS THAT KIDS MAKE THEIR OWN

Once-kids is a soulful, design-obsessed, playful, and sustainable children's toy company. They have created toys that inspired kids to be creative and personalize their play. Toys that are fun, but also create awareness for the environment we live in.

They defined their core competencies by **ONCE**, which stands for **Organic, Natural, Charitable, and Environmentally friendly**. Organic and Natural resources are used in the creation of their products.

Eco-bricks™ Classic

4⁺

Eco-bricks™ classic is a wooden construction interlocking block system that is compatible with major plastic brands with the added feature of customization. With the included 10 color pencils in each Eco-bricks™ Classic set, you can use a melamine sponge (Magic Eraser) to erase and color again. In addition, crayons will offer the same effect.

4⁺

The Playhard Heroes (7.5" tall) are NOW compatible with Eco-bricks™ Plus+! And compatible with plastic block brands, too! Each Playhard Hero is named after a special tree with their own super powers! When finished fighting crime or saving the day, they store easily in their own laser engraved wooden storage box. Once stored they still keep a watchful eye for danger peering out from the lids holes for maximum protection. Each storage box has a chalk board painted interior for more creative fun.

Babai is a manufacturer of high-quality toys made from sustainable wood. These simple, yet intricate designed toys are all natural and safe for the little ones. The line up includes balancing toys, lacing toys, teethingers, dollhouses, games, table/chairs sets, and more. There are also some items perfect as gifts for grown-ups, which include games, pencil cases, and organizers. Made in Ukraine.

DOLLHOUSE ON THE MAGNETS

Give this dollhouse as a gift or enjoy using the wooden pieces to create something new. Comes in 3 sizes and has nine interchangeable pieces with a variety of windows and doors.

In the beginning, there was a pixel. Then the pixel became a volume block. When the second block appeared, the magic of attraction ran its course... More and more blocks appeared, and they began to form different kinds of amazing combinations. New ideas and thousands of unique shapes came into being – and so PIXIO was born.

PIXIO is a unique construction set in which PIXIO blocks are connected thanks to a well-thought-out system of magnets.

now

MAGNETIC CONSTRUCTION SET IN THE PIXEL ART STYLE

One PIXIO block is an ABS plastic cube 0.3 x 0.3 x 0.3 inches in size, weighing just over 1gram (0.04 oz), and has 6 magnets inside. The design of the magnets and resulting polarity allows for the blocks to be connected to each other almost in any sequence from different sides (patent pending).

Just take PIXIO blocks in your hands and bring them together – BANG! – the blocks are connected.

RECOMMENDED AGE: 6+

PIXIO uses a reliable latching fixation system to ensure the strongest possible plastic bond to hold the magnets in place. The product conforms to EN 71-1/2/3, ASTM F963-17 Toy Safety Standards. PIXIO ensures the product is made for a safe play experience for children 6 years of age and older.

The blocks do not contain BPA, phthalates, PVC, latex, or other toxic materials. Keep the product away from items sensitive to magnets (e.g. credit cards, phones, pacemakers, mechanical watches, electronics, etc.). Colors, sizes, and content may slightly vary from the picture on the box.

**CHOKING HAZARD – SMALL PARTS
ADULT SUPERVISION IS REQUIRED**

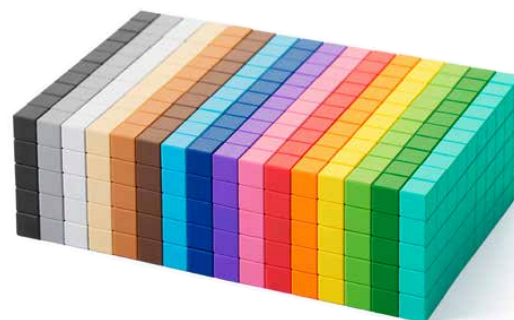

DESIGN SERIES

PIXIO Design Series consists of 6 sets – PIXIO 50, 100, 200, 400, 800 and 1600. The bigger set you take, the more colors and blocks you get.

Download the Free PIXIO App and find hundreds of ideas on how to build colorful, creative and unique objects using these sets!

ABSTRACT SERIES

ABSTRACT SERIES is for those lucky enough to be abstract thinkers. Now you can use PIXIO blocks not just to build objects, but to create thoughts, feelings, and moods as well. Our sets let you dive into a world of color play. Experiment with color combinations as you construct abstract figures and discover unexpected ranges of color, transitions, and contrasts.

MOZABRICK

Mozabrick is a Photo Constructor Set that turns your photos into endless pieces of pixel art. It's great as a gift in the box or assembled as artwork. Simply get a construction set that comes with a 6-digit code and visit mozabrick.com. Upload your desired image, customize, choose a pixelated option that you like, and receive the assembly diagram to your email address. And start building! Recreate a new pixel art whenever you want – the code can be linked to multiple email addresses and has no expiration date. The construction bricks come in 5 monochrome colors - white, light gray, gray, dark gray, and black, and the assembly instructions can be viewed on multiple phones simultaneously. Choose from three constructor set sizes: S, M, or L.

It is fun for the whole family or with friends!

MATADOR[®]

- Learn by playing! -

Started in a little workshop in Vienna in 1903, MATADOR creates attractive, sustainable toys for kids. The concept behind the toys is based on precision-drilled wooden blocks, connecting rods and wheels that could be put together to create a whole host of different machines, vehicles, and so on, then taken apart again. More than 110 years later, this concept remains unchanged.

Once upon a time, a father watched his children getting frustrated while playing with wooden blocks; any complex structure they tried to build simply collapsed. Being an engineer, he designed a wooden toy construction set made of blocks that could be connected with wooden pins. The idea took off and has delighted many generations of children.

The possibilities are almost limitless. Each set comes with its own building instructions, all

with clear illustrations on how to assemble the models. However, Matador will also encourage your child to put together their own ideas.

Our 21st century society is driven by technology, made from computer chips and plastic. But we all want our children to grow up naturally, to use their hands, put things together and not just shift pixels around on a computer screen. There is no better way than encouraging your child to play with wooden blocks.

TECHNICAL UNDERSTANDING

Children want to understand the world! The way Matador models work and function can be observed and understood – technology and physics thus literally become ‘grasp’-able. The building instructions which are designed in pictures enable the children to build on their own.

WOOD FROM SUSTAINABLE FOREST MANAGEMENT

The wood used throughout the Matador production exclusively stems from sustainably managed, local forests. The ‘PEFC’ certificate from ‘HolzCert Austria’ confirms a sustainable forestry.

JOY OF PLAYING

Thanks to the endless building combinations there are uncountable Matador game worlds. Playing freely is an important ‘training’ for children in order to process experiences and impressions and to become acquainted with and assume different roles.

PRECISION IN THE HUNDRED OF MILLIMETER

Matador building blocks must be cut and drilled precisely to a hundredth of a millimetre to be able to ensure an optimal accuracy of fit.

COGNITIVE SKILLS

Acquiring cognitive skills is a crucial part of early childhood development. During the Matador-building experience, cognitive skills are automatically and playfully trained, such as: solution-oriented thinking; ability to reason and planning skills.

CREATIVITY

Children are born with a drive to explore and discover. The best way for children to store practical learning experiences is to grasp them with as many senses as possible. Building freely with a hammer, blocks, and rods encourages your children’s creativity and imagination.

ENVIRONMENTALLY FRIENDLY PRODUCTION

We exclusively use sustainably managed local copper beech wood throughout the Matador production. A sophisticated process reduces the amount of wood waste which is created during production to a minimum. What is more, the packaging is a part of the product and therefore does not need to be disposed of.

3D COMPREHENSION

Matador building blocks train the ability to imagine things in three dimensions. Spatial perception and conception in combination with respective motor skills and good reflexes are essential for physical activities such as ball games and are closely linked with one's body perception and coordination.

MOTOR SKILLS

Playing and building with Matador particularly promotes fine motor skills. Fine motor skills are important for children's development for only with the help of these skills will one be able to learn how to write and draw.

NON-TOXIC COLORS

The bulk of our building blocks is untreated, but you can also be unconcerned regarding our coloured parts. Our products are absolutely, verifiably non-toxic and are regularly tested by independent monitoring labs.

MADE IN AUSTRIA

The unique MATADOR Hammer-Pin-System was invented in 1901 and has been and will continue to be produced entirely in Austria.

FAMILY FRIENDLY COMPANY

Co-ordinating work duties with family needs can often pose a challenge. We strive to have a family-friendly and collaborative environment within our company.

TOP QUALITY THROUGH OWN PRODUCTION

Matador has existed since 1903 and is without a doubt the most legendary Austrian toy and the most famous construction set of all times. This long history in itself proves the unique quality of Matador. A multi-stage quality control continuously guarantees the high quality of the Matador construction sets.

SENSE OF ACHIEVEMENT

Completed models and created phantasy worlds lead to an important sense of achievement for children – a sense of achievement increases one's self-esteem!

MANUAL DEXTERITY

Playing with Matador not only makes our children smarter! Building models actively promotes manual dexterity. When connecting the building blocks and rods with the help of a hammer, toddlers playfully develop specific skills.

100% NATURE

We at Matador stand for 100% naturalness of our products. We exclusively use natural wood which has not been treated with any kind of chemicals. Organic, natural production is in harmony with nature.

MAKER^{SERIES}

The Maker wooden construction sets promote motor and cognitive development of young children aged 3 years and older. Thanks to the own Matador hammer, building blocks and pins are connected so that children playfully develop craftsmanship skills.

EXPLORER SERIES

MATADOR Explorer wood construction sets are unique worldwide in allowing children to develop and implement their imagination and ideas. Thanks to the wood's singular accuracy of fit, these sets fulfill the requirement for both simple and complex models. Blocks drilled to precision, perfectly fitting linking pins, axles and wheels – a variety of construction options which have fascinated young and old for generations.

Unit Bricks are a great way to build science, math, engineering and creativity into daily play. Albert Einstein and Architect Frank Lloyd Wright are just two famous champions of brick play, and studies show children that build with bricks outperform, both in the classroom and throughout their lives. Kids benefit from brick play in numerous ways.
